AED Weekly Inspection Checklist

Month & Year	Defib Model	Defib Serial No.	Defib Location		
	Week 1	Week 2	Week 3	Week 4	Week 5
Date of Check:					
Name of Person Carrying out Inspection:					
Is the defibrillator in a good state of repair and free from damage?					
Are the adult electrode pads in date?					
If you have paediatric pads are they also in date?					
Do you have two sets of adult pads?					
Is the status indicator showing as rescue ready?					
Is the prep kit present and in date?					
Is the AED signage present and in good condition?					
Is your AED cabinet/wall bracket in good working condition?					

If you have answered 'no' to any of the above questions you need to take action straight away. If you are unsure what to do check our FAQs which can be found at www.heartswell.org.uk. Remember to log your actions overleaf and to ensure your defibrillator is in full
